Medicinal Beekeeping for Beekeepers

project no. 2021-1-TRO1-KA220-VET-000034632

TOP NEWS OF THE PROJECT

PROJECT AIMS

By Project Partnership

»»» READ MORE

The fundamental aim of this project is to inform primarily the beekeepers about apitherapy and to train them to produce bee products under convenient conditions at conscious, healthy and definite standards. Another aim is to build up awareness in the people for the importance of the producing, storing and marketing the products used in apitherapy.

READ MORE «««

The training programme on healthy and accurate procedures in the production of bee and bee products which are expected to be used in the treatment of some human and animal diseases is primarily addressed to beekeepers and other target groups involved in production and marketing of bee products used in apitherapy.

PROJECT TARGET GROUPS

By Project Partnership

WHAT WILL YOU FIND AT MEDI-BEEB WEBSITE?

3 INNOVATIVE AND USER-FRIENDLY TRAINING TOOLS IN 5 LANGUAGES

- ENGLISH, TURKISH, ITALIAN, LITHUANIAN AND POLISH

By Project Partnership

➤➤➤ E-LEARNING COURSE

The e-learning course includes ten modules in the field of proper production, processing and storage of bee products used in apitherapy, such as: honey, propolis, pollen, royal jelly, bee venom, beeswax and others. In addition, the course includes information on environmental contamination of bee products, standardization and certification of bee products and legal status of bee products and apitherapy. Each module consists of 25-30 slides fully integrated with e-learning environment. Moreover, the application of e-learning course for mobile phones will be developed to facilitate learning and let trainee flexibly manage his/her learning time.

TAILOR-MADE TRAINING PROGRAMME

The development of training materials in MEDI-BEEB project was preceded by a thorough analysis of the needs of target groups and the current state of art in the field of production, processing and storage of products used in apitherapy.

➤➤➤ SHORT VIDEOS AND PODCASTS

The course has been enhanced with numerous manual videos and podcasts with beekeeping experts on the practical production of high quality bee products.

➤➤➤ HANDBOOK

The innovative and user-attractive with numerous pictures, graphs and charts handbook content will reflect the content of the e-learning course and will be available both in paper form and as e-book.

PROJECT PARTNERSHIP

»»» COUNTRIES AND INSTITUTIONS

MEDI-BEEB project consortium consists of 6 partner institutions (four universities, one beekeeper association and one agriculture association) from four countries.

Aydin Adnan Menderes Üniversitesi - Türkiye-
project coordinator

Çanakkale Onsekiz Mart Üniversitesi - Türkiye

Aydin İli Ari Yetiştiricileri Birliği -Türkiye

Vytauto Didžiojo Universitetas – Lithuania

Confederazione Italiana Agricoltori Regionale Umbria - Italy

Uniwersytet Przyrodniczy we Wrocławiu - Poland

UNIWERSYTET
PRZYRODNICZY
WE WROCŁAWIU

»»» PARTNER MEETINGS

Project implementation and quality of project results are carefully discussed during periodically organized transnational project partner meetings. So far three of four meeting have been organized and final meeting will be held in Kaunas (Lithuania) on 7-10 November 2023 - host of the meeting: Vytauto Didžiojo Universitetas.
